PROFESSIONAL EXPERIENCE

Resume Worded, New York, NY

2017 – Present

Java Developer

- Designed/developed APIs that processed streaming data to power customer recommendation engines, increasing incremental annual revenue to \$1.1M.
- Strategically developed, monitored and enhanced Java Bean components to implement business logic that streamlined an internal application by 14%.
- Led the routing of control from web services to Java services using the Camel Framework, diminishing development costs by \$150,000 annually.
- Contributed knowledge, skills and expertise to all project life cycle phases, accomplishing 5 projects for the company by far.
- Oversaw integration of an external technology solution by leading 5 developers and 9 testers from two companies, resulting in an additional \$1MM of sales.
- Reduced development costs by 25 percent by creating a plan to merge related products into one, more streamlined product.

Growthsi, San Diego, CA

2015 – 2017

Java Developer (2016 – 2017)

- Promoted within 18 months due to strong performance and organizational impact (one year ahead of schedule)
- Facilitated three design thinking workshops for end users to identify use cases
- Successfully conducted API design and development of RESTful Services in 3 months, enhancing operations of the enterprise product in the business.
- Built web services with J2EE that were used by the customer-facing application to improve the time on page for the average user by 2 minutes.
- Worked within an agile team of 5 developers, prioritizing/scoping feature requests to ensure that the biggest impact features were worked on first.

Junior Developer (2015 – 2016)

- Established, maintained, and developed an extensive test coverage for all new features which reduced the number of customer complaints by 7%.
- Interviewed business clients to analyze their business requirements and recommend and design technological improvements to their business processes and operational procedures.

Rofocus, New York, NY

2014

Software Engineering Intern

- Expertly utilized Selenium built out a unit testing infrastructure for a client web application, reducing the number of bugs reported by 11% monthly.
- Worked alongside another developer to implement RESTful APIs in Django that enabled the internal analytics team to increase reporting speed by 24%.
- Implemented 2 new technical solutions while maintaining components of the online betting platform, generating process efficiency/improvement.
- **Tip to jobseeker:** Bullet points should be in format [Action Verb] [Accomplishment] [Metric]; e.g. Developed x that led to y% improvement
